

# Rescue Mattress

## Fast evacuation saves lives

Järven rescue mattress is a new evacuation product developed by Järven Health Care. The rescue mattress is a safety product that can be used for fast and safe evacuation of non-ambulant persons.

The product can be used for non-ambulant persons in nursing homes, hospitals, schools and public buildings where a fast evacuation can be needed in case of fire. This product gives the possibility for just one person to easily evacuate a non-ambulant person whenever it will be needed.

# Järven Rescue Mattress

- Equilateral designed to make it possible to evacuate from both sides.
- Glides with a low friction on both wet and dry grounds.
- Sturdy pull-handles on both short end sides and six handles on each long side for carrying.
- Cross straps with velcro to fix the non-ambulant person.
- Flame proof material that meets the Swedish fire standard SS 876 00 01 equals to BS 6807.
- The product is produced with a heat reflective material that isolates the person from cold ground.
- X-Ray transparent.
- Can be placed upon a wall to quickly be available in case of fire.
