VERSATILE

DURABLE

**SAVION**  
ADVANCED PATIENT CARE®

**Sliding Platform**

**Full-length x-ray lucent elevating platform with access for x-ray cassettes from both sides.**

**Features**

- twin-pedestal hydraulic height adjustment
- height adjustment pedals located on both sides of the bed
- hydraulic trendelenburg-reverse trendelenburg mechanism with twin-pedal operation from either side of the bed allowing attendant's hands to be free at all times
- 200 mm rubber-tread castors, with central-locking brakes and brake-pedals located at each corner, with one steering castor and optional 5<sup>th</sup> wheel steering
- two-section sliding x-ray lucent mattress platform for use with C-Arm systems
- with full-length under-platform cassette shelf, permitting cassette location at any position below the platform, and access from both sides and, depending on configuration and accessories, also from head or foot-ends
- elevating x-ray cassette shelf mechanism to ensure that cassette is flush with the platform
- adjustable backrest to 90° by pneumatic gas spring release, for exact positioning with minimal effort
- lateral bumper strips at each corner

- full-length under-bed thermoformed ABS base cover, with built-in oxygen cylinder cradle and ample storage space for patient effects
- collapsible fold-down type side-rails permit access to cassette shelf in all positions
- 4 infusion pole sockets are standard
- finish - epoxy polyester powder coating including metallic silver finish
- standard mattress: 10cm polyfoam filling with pressure reducing profile and with anti-bacterial, anti-static, fire-retardant, water-proof cover.
- wide range of options and accessories available including: 5<sup>th</sup> wheel steering, emergency trendelenburg release pedal at the head-end, transporter push bars, combination foot-board/monitor shelf/ documents storage compartment, IV poles, patient restraint straps, mobile IV pole attachment clamp, overbed-tray.
