SAVION
ADVANCED PATIENT CARE®

Millennium line

Savion's Millennium Line new generation of patient care equipment - including hospital stretchers, ICU beds and shower trolleys - is designed for maximum patient comfort and safety - with minimum attendant effort and exertion

MODEL ES710 / 710FF

Model ES710FF

Standard features

Fold-under side rail release lever. Corner sockets for IV pole / accessories - with corner protection bumper

Built-in underbed oxygen cylinder cradle. Clearly marked height adjustment and trendelenburg pedals-on both sides

Central locking castors - brake/steer pedals at each corner

Knee-break/gatch operated by manual crank (model ES710FF)

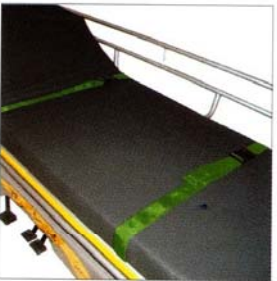

Optional features and accessories

head-end trendelenburg

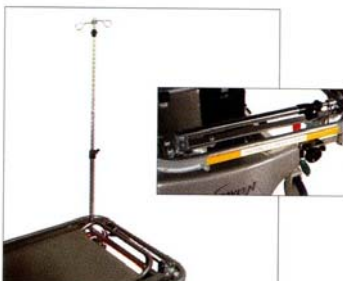

IV stand towing bracket

patient restraint straps (in black only)

Combi-foot board and monitor shelf with patient records box

Telescopic IV pole or fold-away telescopic IV pole

5th wheel steering

Features - Benefits

- twin-pedestal hydraulic height adjustment provides maximum stability in every situation
- height adjustment pedals located on both sides of the stretcher
- hands-free hydraulic trendelenburg / reverse trendelenburg mechanism with twin-pedal operation from either side of the stretcher
- 4 x 200 mm (8") castors, with central-locking brakes and brake-pedals located at each corner and one steering castor
- two- or four-section epoxy coated steel sheet mattress platform for extra strength and durability
- backrest adjustable by pneumatic gas spring release, provides infinite positioning at minimal effort with optional full fowler version available
- full length lateral bumper strips
- corner protection bumper strips
- full-length underbed thermoformed ABS base cover, serves as built-in oxygen cylinder holder and storage-space for patient's effects
- full length adjustable siderails - choice of "zero-gap" pneumatically assisted fold-under type or fold-down type
- 4 infusion pole sockets are standard
- finish - epoxy polyester powder coating
- height adjustment range 59-91 cm

Construction

Twin-pedestal construction - the safest and surest way to ensure that the platform is always stable in every medical situation. The twin-pedestal hydraulic mechanism provides hands-free trendelenburg and reverse trendelenburg positioning to maximum angles - and can be operated from either side of the stretcher.

The base frame - manufactured from durable and robust galvanized steel - is covered by a sturdy and elegant moulded ABS cover - which serves also as patient storage tray and built-in oxygen cylinder storage cradle.

Mattress platform is manufactured from high-grade steel sheets, finished in epoxy-polyester powder coating - in a choice of color finishes. Also available in stainless steel, or HPL (high pressure laminate).

Backrest adjustment is achieved through the use of powerful pneumatic gas spring - effortless for the attendant and with infinitely variable positioning for ensuring maximum patient comfort. Model ES710FF has crank operated knee gatch.

Mobility

The Millennium ES710 is fitted with 8" (200 mm) castors, with 4-wheel locking and built-in steering mechanism which can be operated from any of the 4 corners of the stretcher by clearly indicated rocker pedals.

The castors have thermoplastic rubber treads - ensuring longer life and smooth-running as well as improved mechanical behavior such as wear resistance, resistance to temperature extremes and improved mobility.

Color Options

Choice of white, cream or cool grey - metallic silver available at additional charge.

Mattress

Pressure reducing 10cm (4") foam mattresses with waterproof, anti-bacterial, fire-retardant and anti-static cover.

Specifications* - Emergency/Transportation Stretcher: model ES 710 / ES 710FF

Overall

length:	204 cm	81"
overall width: fold-under siderails	84 cm	33"
fold-down siderails	76/81.5 cm	30/32"

Mattress Platform

length:	191 cm	75"
width: with fold-under siderails	73.5 cm	29"
width: with fold-down siderails	63/73.5 cm	25/29"

Height Adjustment Range

minimum height	59 cm	23"
maximum height	91 cm	36"

Siderails

fold-under: length	202 cm	79.5"
height	32 cm	12.5"
fold-down: length	145 cm	57"
height	41 cm	16"

Trendelenburg and reverse trendelenburg +/- 17°

Castors

8" with central locking
one tracking
4 brake/steer pedals

IV attachment sockets:

4

Weight: (ES710)

112.5kg 248 lbs

Maximum patient load:

250kg 550 lbs

Options

- electric and semi-electric version
- head/foot-end hydraulics
- 5th wheel steering
- push bars
- full fowler - knee-break/gatch adjustable by crank (model ES710FF)
- X-ray lucent backrest
- restraint straps
