- How do you store 16 IV stands on less than 0.5 m<sup>2</sup> or..  
..carry IV stands easily, for efficient mobile care?

Stable and functional

**VIOLITE** a truly new innovation that will change how you think of IV stands.

Besides being a state-of-the-art IV stand, it is portable, light, practical to transport and SO easy to store.

**Home and mobile care**

Its mobility and nice design makes it perfect for home care and mobile use.

VIOLITE is easy to carry in stairs and transport in cars, buses and trains.

**Huge space saver**

The true revolution with VIOLITE is its compact and collapsible design and the possibility to store them hanging.

With our 2-level rack you may store 16 VIOLITEs on less than 0,5 m<sup>2</sup>. No more chaotic storage rooms!

This makes VIOLITE a storage dream for medical centers and hospital units.

VIOLITE is a great help for architects and planners of new hospitals and other medical facilities, when it comes to save space.

In an examination room, hang a VIOLITE on the wall when not using it instead of having the IV stand take up floor space.

VIOLITE is available in many different colors, red is standard.

There is no need to hide the good looking VIOLITE!

Easily collapsible

Practical to store

Light to carry
