

Infusion stand

Both our standard infusion stand and our dosage pump infusion stand are designed in keeping with the qualitative and functional standards demanded by Swedish hospital professionals.

Frame

All-welded chromium-plated steel tubes with four hooks for intravenous containers.

Locking device

The stand is locked at the desired height with an expansion-locking device.

The expander clamps firmly around the whole inner tube, which ensures safe locking and also extends the useful life of the stand.

Base

The heavy; detachable, five-leg wheel base provides stability.

Wheels

Easy-roll castors glide smoothly and safely also on carpeted areas.

Steering handle

Vertically adjustable and detachable.

Infusion stands for dosage pump

Has a stable construction with the dosage pump mounted at the centre of the stand.

Dimensions and specifications

Heights of standard infusion stand: 125-225 cm.

Heights of infusion stand for dosage pump: 129-229 cm.

Diameter of wheel base: 59 cm.

Wheels: 100-mm castors with grey rubber surface. Antistatic castors as accessories.
